Lesson10 - Files

الدرس 10 - الملفات

Saeed Isa

Read/Write files

- ▶ `file_dp = open('file_path', 'mode')`
- ▶ Mode:
 - ▶ “r”: mode to read only
 - ▶ If does not exist → throw error
 - ▶ “w”: mode to write file only
 - ▶ If file does not exist → it will create one
 - ▶ If file exists → it will override
 - ▶ “a”: append mode, write to the end of the file

Read/Write functions

- ▶ `read()/read(#)`
- ▶ `readLine()`
- ▶ `readLines()`
- ▶ `write()`
- ▶ `writeLines()`

Last but not least:

Don't forget to close the file → `file_dp.close()`

Let's try...😊

- ▶ Open PyCharm:
 - ▶ Create new file: files.py
 - ▶ Start coding 😊

“

Thank you 😊!
