Selection & Bubble sort

Saeed Isa

# Sorting

0	1	2	3	4	5	6	7
20	7	1	62	33	29	12	50

1	7	12	20	29	33	50	62
---	---	----	----	----	----	----	----

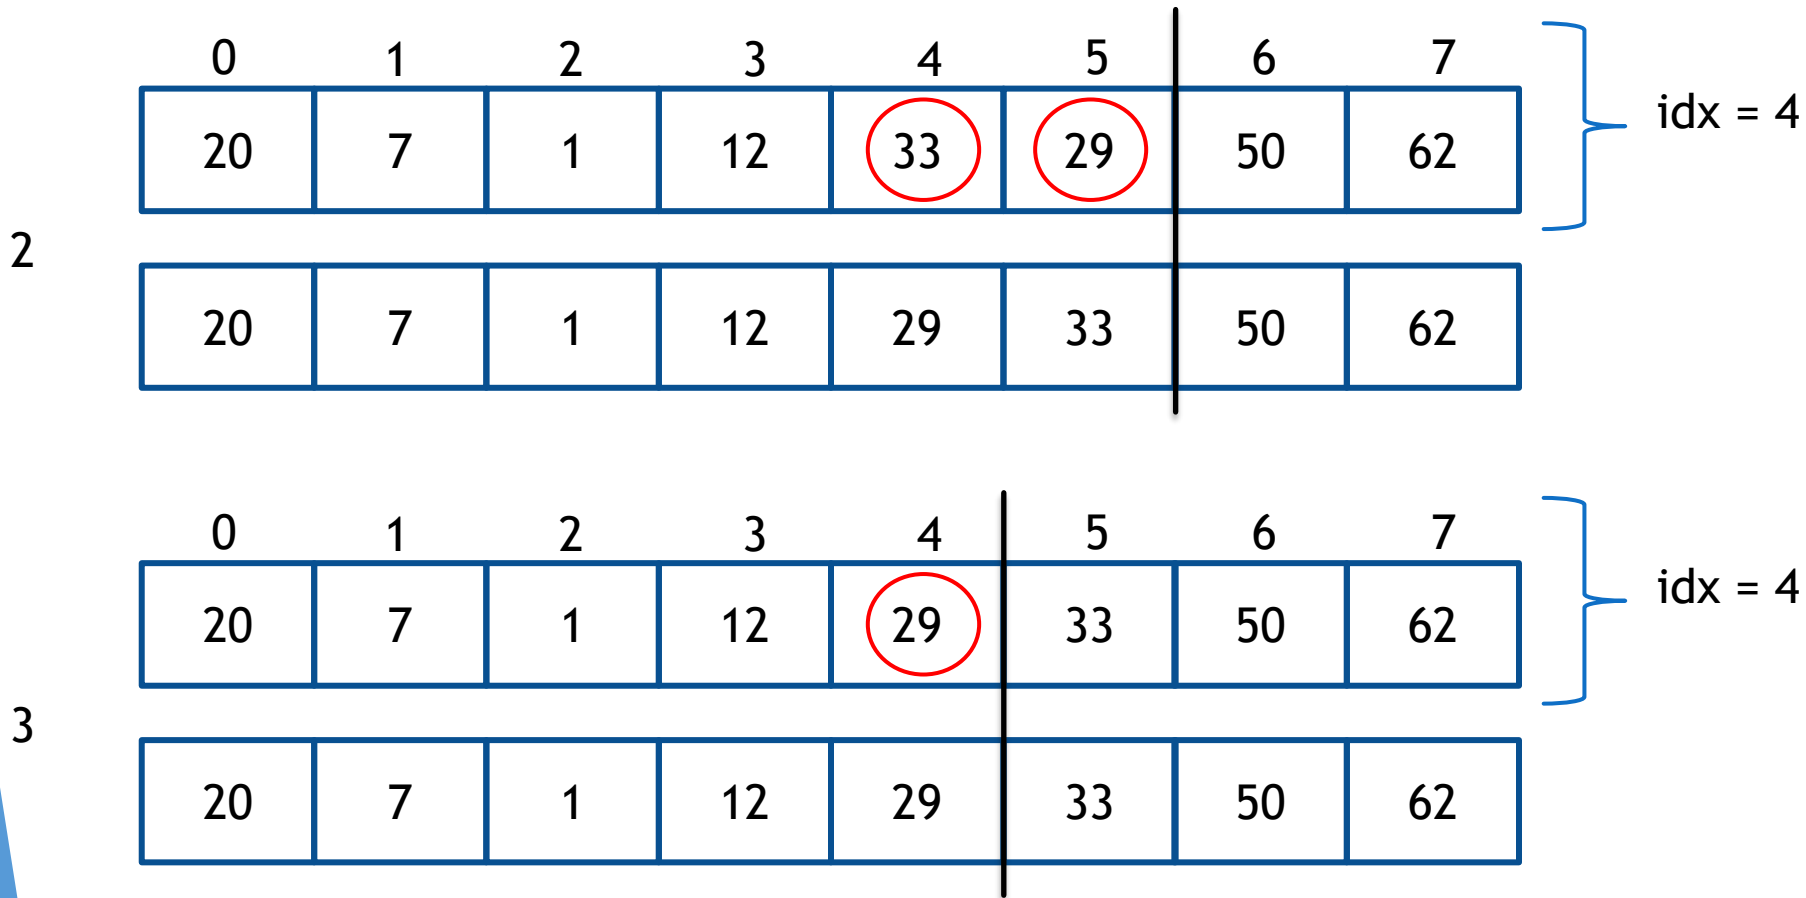

# Selection sort algorithm

- ▶ Find max item in list
- ▶ Swap with last element  $\text{list}[\text{idx}] \Leftrightarrow \text{list}[\text{n}]$
- ▶ Find max item in in sub-list  $\text{list}[:\text{n}-1]$
- ▶ Swap with last element  $\text{list}[\text{idx}] \Leftrightarrow \text{list}[\text{n}-1]$
- ▶ ...
- ▶ Repeat the same steps till list length is 1

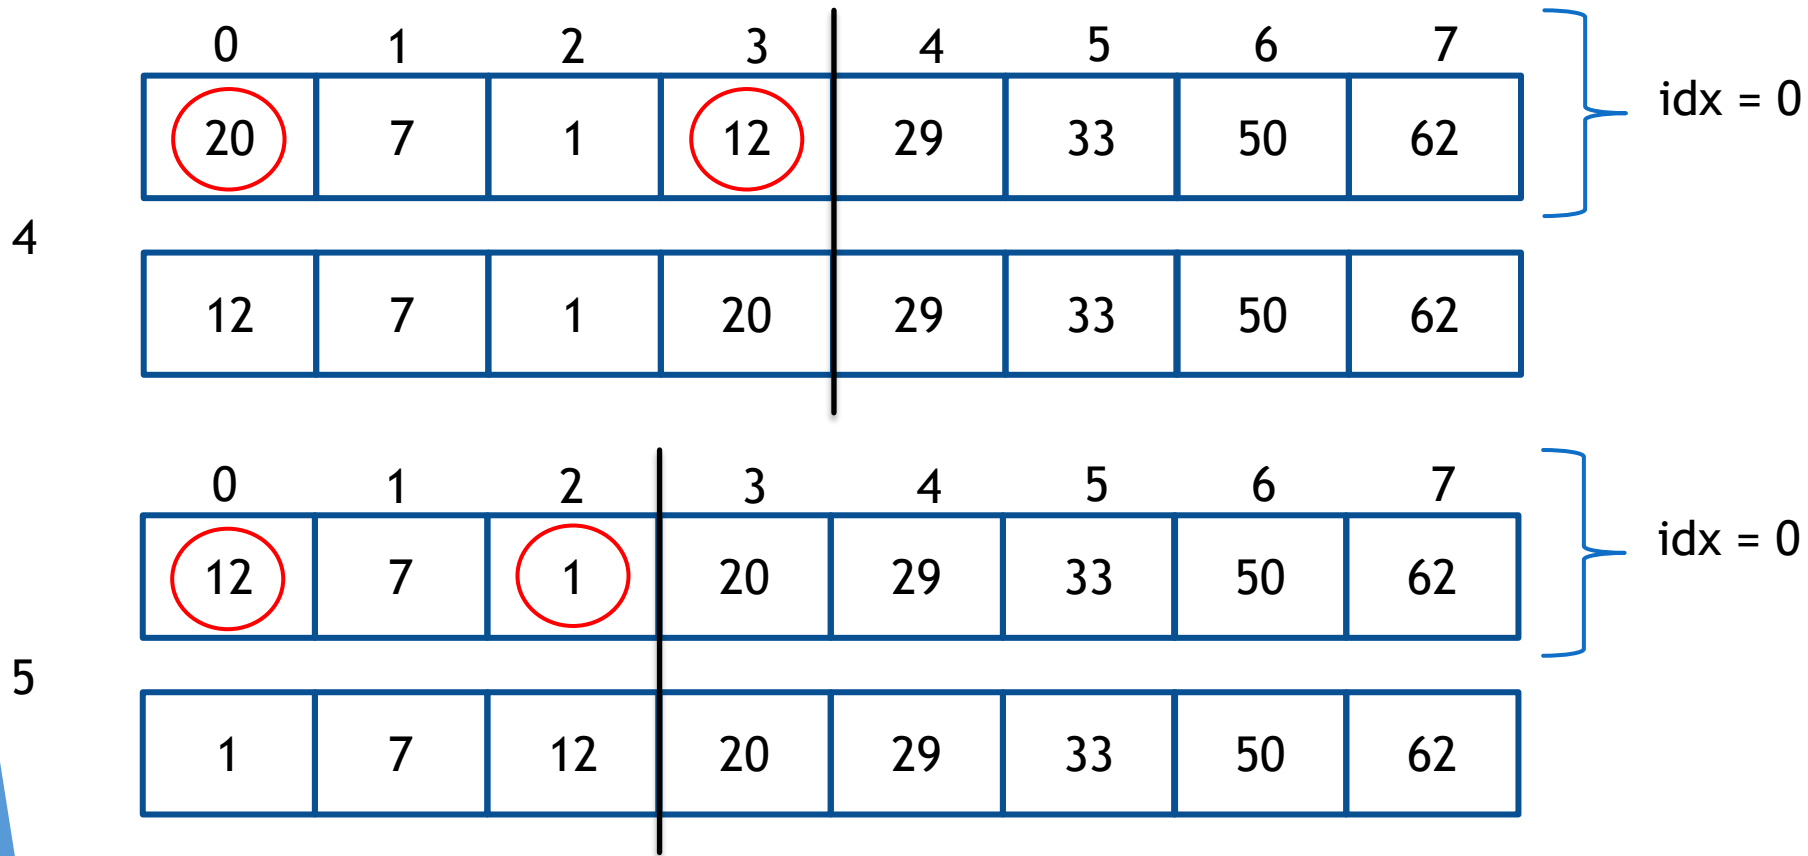

# Selection sort

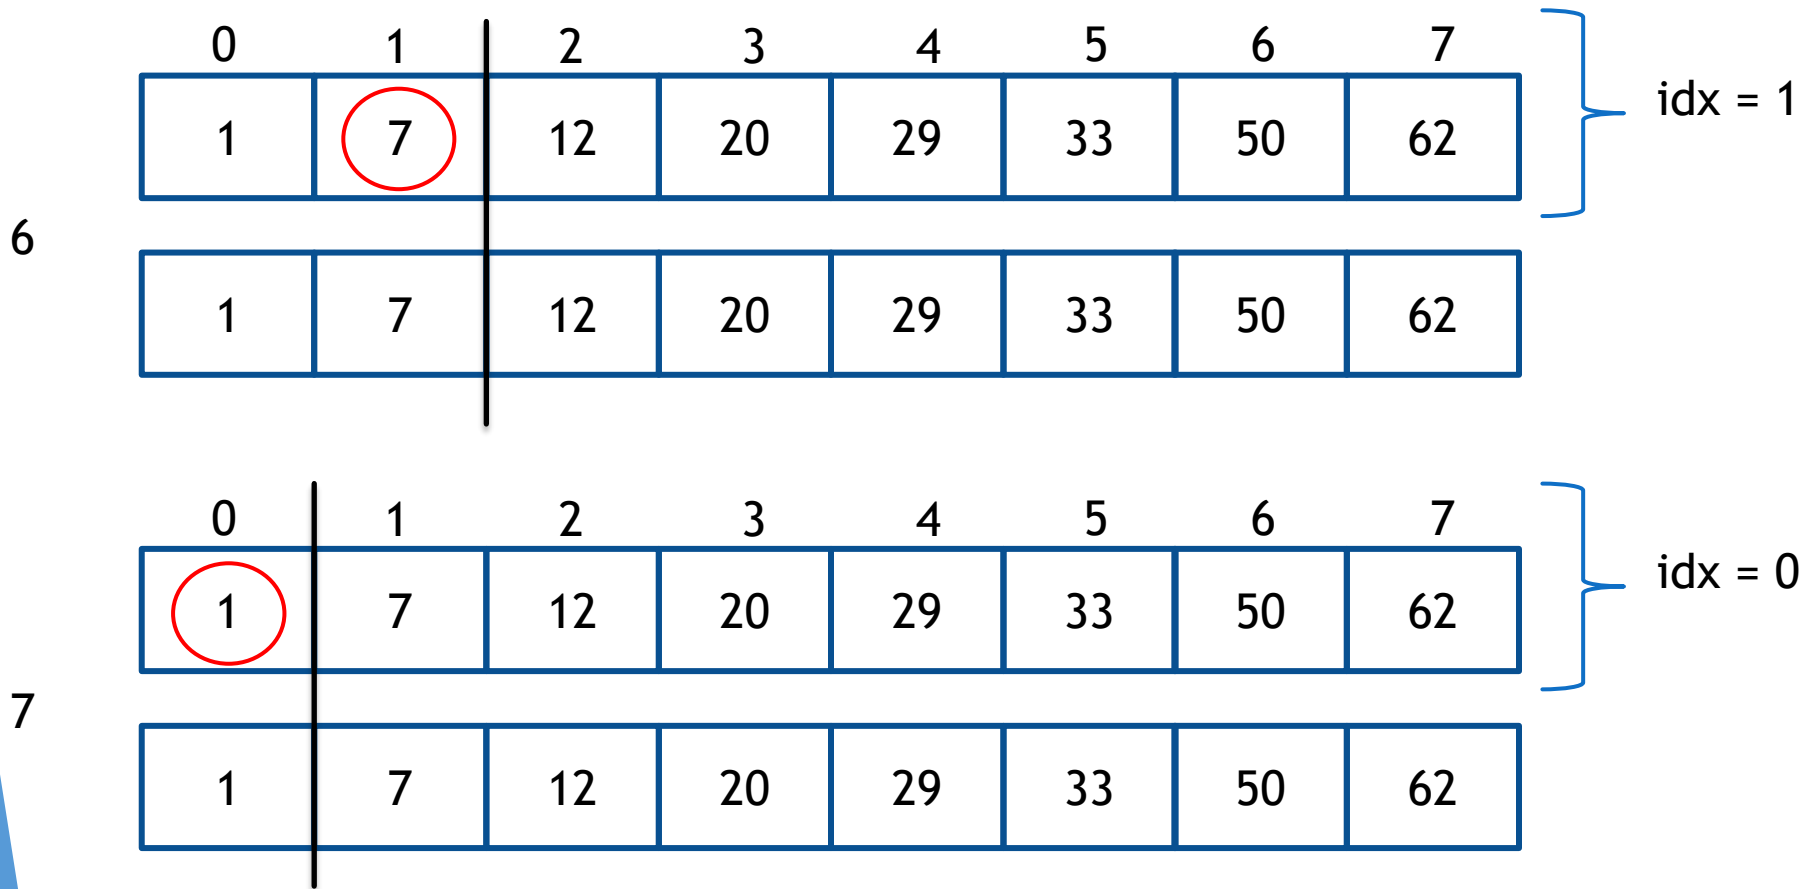

# Selection sort cont.

# Selection sort cont.

# Selection sort cont.

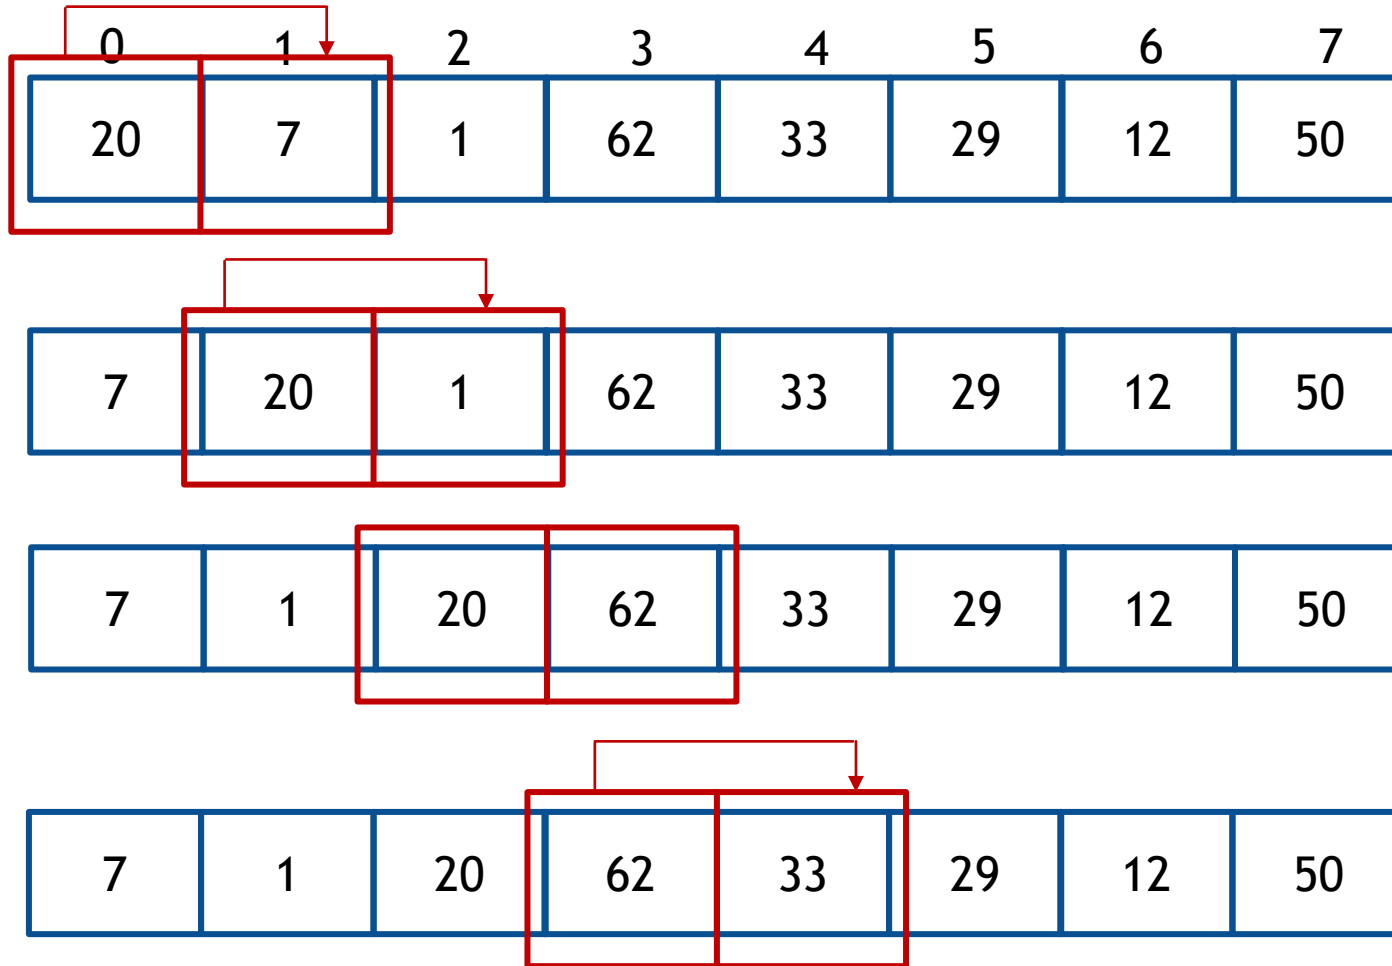

# Bubble sort algorithm

- ▶ Iterate over all couple  
Start from first couple, compare first with second  
if greater - bubble them (swap)  
continue to next couple...
- ▶ Repeat till list[n-1]
- ▶ ...

# Bubble sort

Iteration 0

# Bubble sort cont.

# Bubble sort cont.

Iteration 1
