Programming

Lesson13 - Import الدرس 13 - ادخال وادراج معلومات Saeed Isa

Why?

- Writing everything in one place? Toooooooo much
- Real program requires team > 2

...

saeed.isa@gmail.com @saeedisa90 2

Import

- from <where> import <what>
- Notes:
 - * means all
 - . means current directory
 - .. Means previous directory

Example: root/

```
functions1.py
functions2.py
my_dir/
functions3.py
```

saeed.isa@gmail.com @saeedisa90

Let's try...©

- Open PyCharm:
 - Create new file: try_except.py
 - ► Start coding ©

saeed.isa@gmail.com @saeedisa90 4

Thank you ©!
